About the Event

In an era of rapid technological advancement, the integration of artificial intelligence (AI) and emerging technologies into governance frameworks has the potential to revolutionize the way societies are governed. The 14th AfICTA eConference delve into the transformative role of AI and emerging technology in shaping governance, promoting transparency, ensuring accountability, and driving digital transformation, with a special focus on its impact on digital transformation.

As societies become increasingly digitized, the need for effective governance mechanisms becomes paramount. AI and emerging technologies offer unprecedented opportunities to enhance decision-making processes, optimize resource allocation, and improve service delivery in various sectors. By leveraging these technologies, governments can foster greater transparency, accountability, and… Read more
