

Amged B. Shwehdy's Profile

Amged B. Shwehdy has been at the forefront of ICT policy and governance reform in Libya, shaping national discussions on digital transformation, data protection, and Internet governance. As founder of ISOC Libya and a driving force behind the Libya Internet Governance Forum, he has advanced inclusive digital policies that foster innovation, job creation, and a stronger ICT ecosystem across the region.

He is an expert in Digital Transformation, specializing in research and policy with a focus on governance and innovation. With eight years of experience, he has been leading initiatives related to the Internet, innovation, and policy, contributing to the promotion of digital citizenship and the advancement of digital transition. Amged believes in the transformative power of technology to connect people, stimulate economic growth, and support sustainable global development. Amged combines his academic background with extensive experience collaborating with local and international stakeholders. This fusion of knowledge and practice equips him with a robust skill set in digital strategies, change management, and project management, essential for designing, implementing, and evaluating digital ecosystems in complex environments. Central to his mission is a dedication to bridging the digital divide, ensuring technology is an inclusive and accessible tool for all.
