

Mr Hazem Eltawab's Profile

Mr Hazem Eltawab is the Founder and CEO of **ReNile**, a dynamic startup at the forefront of IoT systems for Agriculture and Aquaponics applications, driving innovation in the agri-tech sector. Furthermore, he is proud to serve as a **Business Consultant** for the **Electronics Factory**, a crucial entity within the esteemed **Arab Organization for Industrialization**. In this capacity, he contributes his expertise to enhance the electronics manufacturing landscape. His journey has also led him to excel as a **Business & Management Consultant** at **Nexel Partners**. In this role, he played a pivotal part in propelling digital transformation initiatives for diverse clients across the MENA region.

Education has always been a cornerstone of his journey. He has had the privilege of imparting knowledge as an **Academic Teacher** at **Zewail City for Science and Technology**. His areas of specialization encompass **Renewable Energy, Waste Valorization, Business Planning, Entrepreneurship, and Startups**. His academic journey commenced with a **Bachelor's Degree in Energy and Bioprocess Engineering** from **Zewail City**, and he further enriched his qualifications with a **Master's in Engineering Management** from **Arizona State University**.

As his horizons continue to expand, he finds himself drawn to the realm of **agricultural investments** and **local manufacturing projects**. The prospect of contributing to these vital sectors resonates deeply with him.
