Africa's Digital Agenda: The Role of Digital Infrastructure and Connectivity

Speaking

Date: 7th December, 2022

Time: 13:30 - 14:30 (UTC)

1 Sthe Summit

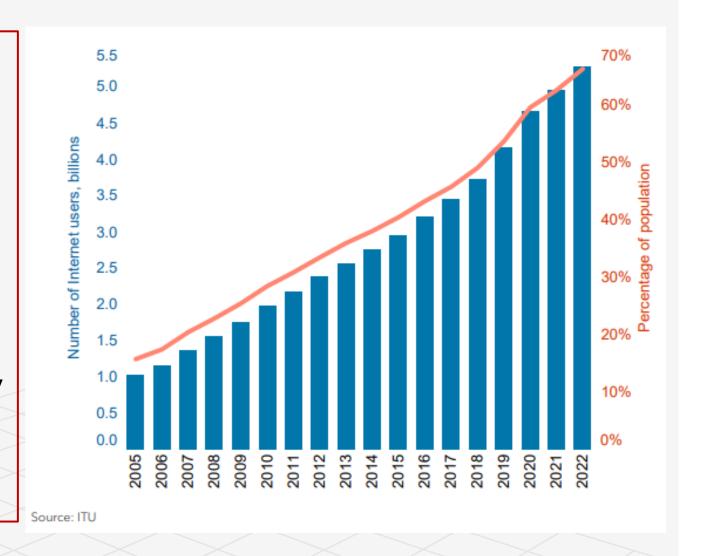

December 7-8, 2022

**Dr. Jabhera Matogoro**Lecturer, The University of Dodoma

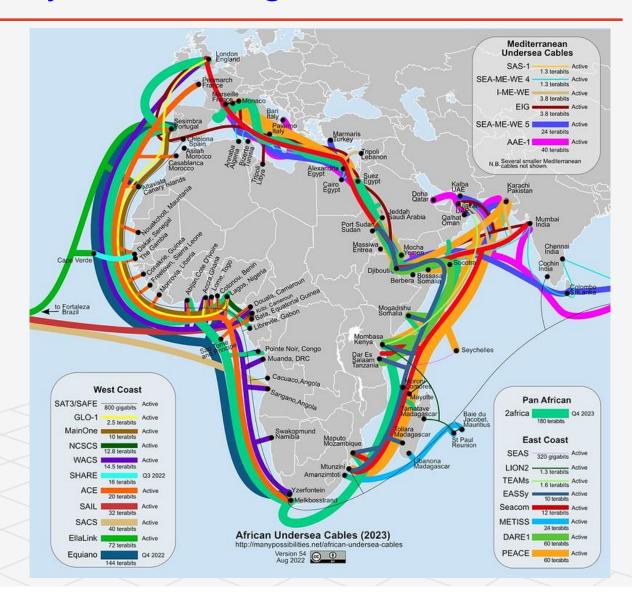

## Digital Infrastructure and Connectivity – Global Statistics

- Globally, about 5.3 billion people uses Internet (ITU, 2022).
- About 29.3 billion devices will be connected to IP networks by 2023 (CISCO, 2020)

## Digital Infrastructure and Connectivity – African Region

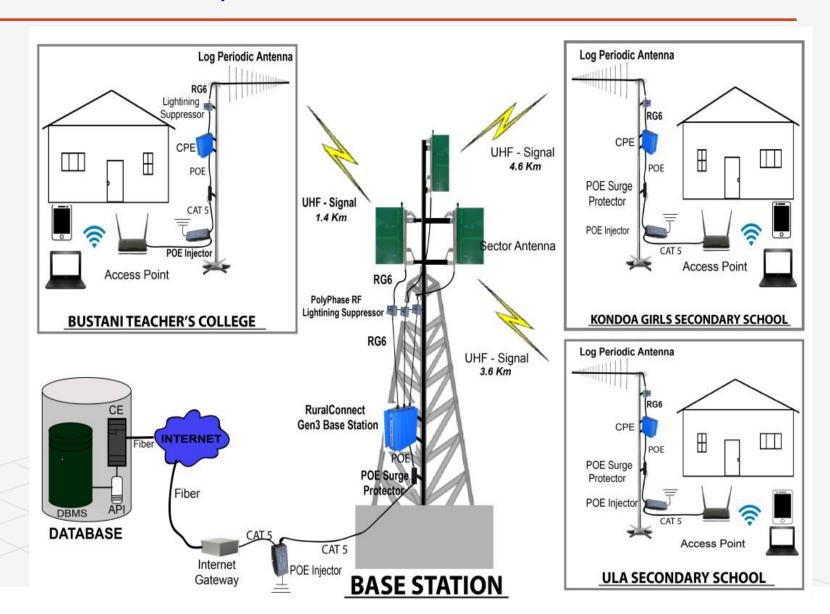

- Africa Region has the lowest Internet usage statistics, only 40% of the population.
- Does the African Region work towards, Meaningful Universal Connectivity (affordable, reliable and safe internet)?

## Network Architecture for TV White Space

#### Key Components:

- 1. Base Station
- 2. Sector Antenna
- 3. Geolocation Database
- 4. Log Periodic Antenna
- 5.CPE
- 6. Access Point

## Broadband Toolbox – African Region

- What if African Countries could put in place an enabling environment that support different broadband connectivity approaches?
- Satellite, TV White Space, MNO,
  Free Space Optics, etc.

## Why low uptake of AI in African Region?

**Marginalized Groups** 

6

### Al Hardware Infrastructure

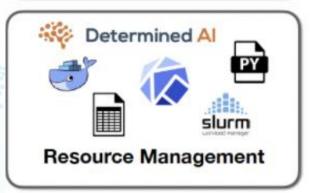

- Data server (on-site and cloud)
- High Performance Computing (HPC)
- Computing resources on-site (GPUs) and cloud
- Internet connectivity i.e., network devices, bandwidth, etc.

## Al Software Infrastructure

- AI/ML software and frameworks
- Data labelling and versioning
- Software engineering tools
- AI Experiment tracking and management
- Optimisation, hyper-parameter tuning softwares and resource management software

Experiment Management

## Africa's Digital Agenda: The Role of Digital Infrastructure, Connectivity and Artificial Intelligence

- · Role of digital infrastructure, connectivity and artificial intelligence:
  - Realization of ICT-based economic development.
  - Address the current digital divide, rural and urban areas.
  - · Access to modern services including education, health, jobs, agriculture, etc
  - Work from anywhere
  - Home entertainment and connectivity
  - Increase country's GDP growth.

# Thank you for Listening!
